

MAGNASCALE - Magnetic Water Conditioner

MAGNASCALE - Magnetic Water Conditioner

The Magnetic field physically changes the water's molecular structure, reducing the size of the water molecules. This reduced molecule size helps effect water hardness. As a result, limescale and calcium build up can be reduced in hot water cylinders, plumbing hardware and home appliances helping with less maintenance time and costs.

Installation of the Magnetiser can be as simple as installing it on your existing water line into the home or factory.

Advantages:

- Helps control scale without the use of chemicals
- Can extend the life of fixtures, pipes, water heaters and appliances
- Environmentally friendly and safe for plants and animals
- Does not remove anything from nor add anything to the water
- No wasted water or by-products.
